

# How to make broken glass safe *in seconds...*

Roll Size: 1M x 15M

**INSTANT & ECONOMICAL**

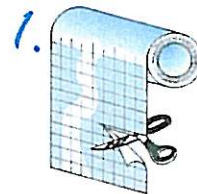

**EASY TO APPLY**

**NO LOSS OF NATURAL LIGHT**

Use 'GLASFIX'... a simple, effective adhesive covering which acts as a temporary protective coating for broken or cracked glass surfaces.

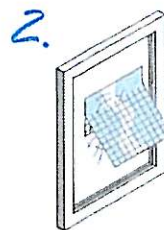

- Quicker, simpler and more cost effective than boarding up
- Clear film – no loss of natural light
- No experience necessary – easy to apply
- No special tools required
- Warning stickers supplied for safety

*It's so easy...*

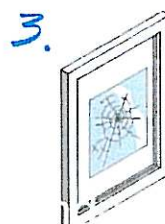

*Cut...*

Using the gridded backing paper as a guide, cut the film to cover the damage

*Apply...*

Apply film starting from the top. Smooth from side to side using a soft cloth while removing the remaining backing paper

*Result...*

Seconds later the repair is complete. The glass is now safe until a new pane is fitted
